## Summary

With a 20-year background in mortgage loans, sales, and customer service, I bring a people-centered approach to tech. In less than two years of coding, I've completed eight projects across various tech stacks, combining user-friendly interfaces with reliable back-end systems. I'm driven by usability, results, and a commitment to continuous growth in tech. Let's build impactful digital experiences together.

---

## Experience

### Full-Stack Developer Projects

- **Bello-Flix Application** (MERN and MEAN Stack)  
Developed Angular and React versions of a movie streaming app to improve content discoverability and user experience, using Redux for consistent state management.
  - **Mobile Chat App** (React-Native, Expo, FirestoreDB, Gifted Chat)  
Built a real-time chat app in React Native with Firebase Auth, offering seamless messaging with offline support for users in low-connectivity areas.
  - **Meet** (PWA, AWS, Lambda, Google Calendar API)  
Created a serverless PWA with React and Google Calendar API integration, simplifying event planning by managing schedules in one place.
  - **Recipe Management App & Bookstore App** (Python, Django)  
Developed secure, searchable recipe and bookstore platforms with Python and Django, providing users easy access to organized digital libraries.
  - **Poke Dex** (HTML, CSS, Javascript, Pokemon API)  
Built a lightweight, fast-loading web app with HTML, CSS, JavaScript, and the Poke API, delivering a smooth experience for Pokémon fans.
- 

## Education

### CareerFoundry Full-Stack Web Development Bootcamp

2023-2024
