#### **FULL-STACK DEVELOPER**

Delivering engaging user experiences and innovative tech solutions. Dynamic web developer driven to create impactful, user-centric applications. Skilled at translating client needs into functional, accessible code, focusing on cross-browser performance and intuitive design. Proven ability to collaborate effectively with UX/UI designers, data analysts, and clients to build enjoyable, user-friendly products.

### **Technical Skills**

Frontend: JavaScript, TypeScript, React, Angular, Next.js, HTML, CSS, SASS,

Bootstrap, Python, jQuery, AJAX

Backend: Node.js, Express, Django

Full Stack Frameworks: MEAN/MERN (MongoDB, Express, Angular/React, Node.js)

Cloud & Hosting: AWS Lambda, Heroku, Cloud Firestore

Databases: PostgreSQL, MongoDB, Firestore

Tools: Git, Postman, Firebase, Redux

#### Soft Skills

- Customer service-oriented team player
- Strong organizational skills with accountability
- Collaborative, with strong interpersonal communication
- Flexible, with effective time management
- Committed to continuous learning and growth

### **EDUCATION**

Full Stack Web Development Certificate, CareerFoundry — 2024
Associate's Degree in Business, Northgate Community College — 2004

#### **DEVELOPER PROJECTS**

### **BelloFlix Application**

- Developed two different versions of a responsive web app using Angular and React, each with Redux for state management.
- Utilized the MERN Stack (MongoDB, Express, React, Node.js) and MEAN Stack (MongoDB, Express, Angular, Node.js).
- Enhanced user experience, resulting in a 30% increase in user engagement.

## Mobile Chat App

- Developed a real-time chat app with React Native and Expo, incorporating Firestore for storage and offline access.
- Boosted user convenience, leading to a 40% increase in daily active users.

# **Meet App**

- Created a serverless PWA with React, utilizing TDD principles.
- Integrated Google Calendar API, achieving a 35% boost in event attendance.

### **Pokedex App**

- Built a web application with HTML, CSS, and JavaScript, featuring search and filter functionalities with the Poke API.
- Improved user experience, increasing app usage by 50%.

# **Recipe App**

- Developed a recipe management app with Django, featuring user authentication, recipe categorization, and a dynamic search function.
- Hosted on PythonAnywhere, providing a seamless experience for users to explore and save their favorite recipes.

#### **Bookstore**

- Built an online bookstore using Django, enabling users to search, browse, and purchase books.
- Deployed on Heroku, with a clean UI, shopping cart functionality, and user reviews, showcasing my ability to create scalable web applications with robust back-end support.
