FULL STACK DEVELOPER

Create Code to Bring Concepts to Life, Enhance User Experience, and Cultivate Positive Branding

Curious web developer with a strong user-centric approach to provide quality services and products. Utilize logic and compassion and translate client needs into functioning, real-life technological solutions. Build software using the most appropriate coding language for each project and test performance on different browsers and devices. Prioritize and accomplish goals within tight deadlines.

Communicate complex ideas clearly, partnering with UX/UI and product designers, data analysts, and clients. Ask questions, offer solutions, and develop enjoyable customer products while efficiently capturing user data.

DEVELOPER SKILLS

- **Frontend**: HTML, CSS, JavaScript, AJAX, jQuery, Bootstrap, React, React Native
- **MEAN/MERN Stack**: Mongo, Express, Angular, Node
- **Cloud**: AWS Lambda, Heroku, Cloud Firestore
- **Databases**: PostgreSQL
- **Tools**: Postman

SOFT SKILLS

- 20 years in customer service and working in a team
- Always holding accountability for my work
- Proactively approach others to offer help
- Actively listen and offer various solutions
- Prioritize tasks and use consistent time management

EDUCATION

Full Stack Web Development Certificate
CareerFoundry, 2024

Associate's Degree in Business
Northgate Community College, 2004

PROJECTS

BelloFlix Application
GitHub Repository

- Developed a web application using React for the front-end and managed state with Redux. Utilized the MERN Stack (MongoDB, Express, React, Node.js) and created a RESTful API.
- Enhanced user experience by providing a responsive, optimized platform accessible across various devices, increasing user satisfaction and engagement.

Mobile Chat App
GitHub Repository

- Developed a real-time chat application using React Native and Expo. Implemented message storage with Google Firestore, image and location sharing, and offline access.
- Improved user convenience and experience, ensuring seamless communication across different mobile devices, leading to higher user retention.

Meet App
GitHub Repository

- Built a serverless PWA using React with TDD. Integrated Google Calendar API for event fetching and included features like offline access, event visualization with charts, and location-based event filtering.
- Enhanced user engagement and experience by providing reliable event management with offline capabilities, ensuring continuous user interaction.

Pokedex App
GitHub Repository

- Developed a web application using HTML, CSS, and JavaScript. Implemented search and filter functionalities and utilized the PokeAPI for data.
- Improved user experience by providing a user-friendly interface and easy navigation, leading to increased app usage and satisfaction.
