Portfolio: <https://ajsorbello.github.io/AJfolio/> • 206.499.2021

## Core Competencies

Full-Stack Web Development • React • TypeScript • Python • JavaScript • Node.js • Django • SQL • HTML • CSS • REST/GraphQL APIs • PostgreSQL • Firebase • Supabase • AWS • OAuth • CORS • PWA • GitHub • Serverless Architecture • Agile Development • Financial Data Analysis • Client Relationship Management

## Professional Experience

### Build It Records | Full Stack Developer - Owner | Remote | 2015 to Current

- Built and deployed a full-stack music label platform using React, TypeScript, Node.js, PostgreSQL, Supabase, Vercel, and Render.
- Developed secure authentication, RESTful APIs, and user dashboards to support content uploads and artist management.
- Designed a responsive UI and integrated playlist curation, resulting in a seamless UX across devices to drive sales and Spotify listens.

### Bello-Flix Application | Full Stack Developer - Owner | Remote | 2023-2024

- Engineered dual versions of a movie app in Angular and React to compare performance and user flow.
- Implemented Redux for state management, MongoDB for scalable storage, and integrated real-time movie APIs.
- Enhanced engagement and navigation speed by 30% through refined component structure.

### Mobile Chat App | Mobile Developer | Remote | 2023 to 2024

- Developed a mobile chat application for Android & iOS using React Native, Firebase Auth, and Firestore.
- Enabled offline messaging, real-time communication, and location sharing with Google Maps and Gifted Chat.
- Achieved 99% message delivery reliability in low-connectivity testing environments.

### Recipe & Bookstore Applications | Full Stack Developer | Remote | 2023 to 2024

- Built two full-stack Django applications with PostgreSQL and Heroku/PythonAnywhere deployment, covering recipe management and e-commerce functionality.
- Developed secure user authentication, dynamic CRUD features, and advanced search/filtering for an optimized user experience.
- Integrated responsive UI, shopping cart, and categorized browsing to enhance performance and usability across devices.

### Meet App | Full Stack Developer | Remote | 2023 to 2024

- Built a serverless Progressive Web App using React and test-driven development (TDD) with Jest.
- Integrated Google Calendar API for real-time event retrieval and location-based filtering.
- Added offline support and data visualization with Recharts for event analytics and accessibility.

## EDUCATION

North Seattle | Business Degree | Seattle, WA | 2003

Career Foundry | Full Stack Development | Seattle, WA 2024
